DECLARATION

I, Dakshesh N (241401017), declare that this report titled “Meeting Minutes and Action-Item Tracker” documents my individual project work for CB23F35 – Low-Code Application Development using Zoho Creator. Features that were not implemented or could not be verified are identified accordingly.

I further declare that this work has not been submitted for any other degree or course credit. External references used in preparing this report are acknowledged in the references section.

Place: Chennai SIGNATURE OF THE STUDENT

Date: _____ DAKSHESH N

ACKNOWLEDGEMENT

I thank the management and Principal of Rajalakshmi Engineering College for providing the facilities required for this project.

I thank the Head of the Department and course faculty for their guidance and support during the project.

I also acknowledge Zoho Creator documentation and learning resources that helped me understand the platform.

I am grateful to my family and friends for their support.

DAKSHESH N

ABSTRACT

Meeting information and follow-up tasks are often recorded in separate notes or spreadsheets. This can make it difficult to locate earlier discussions, identify task owners and track due dates.

The Meeting Minutes and Action-Item Tracker was created in Zoho Creator. It includes a Meetings form, an Action Items form linked to Meetings through a lookup, reports for meeting and task records, and a dashboard page. No external integrations or custom Deluge scripts are claimed in this report because supporting evidence was not supplied.

A sample meeting and action item were entered to check record creation and the lookup relationship. The application provides a central place to review records; performance gains and production deployment details have not been measured or independently verified.

Keywords: Low-Code Development; Zoho Creator; Meeting Minutes; Action Items; Record Management

PROJECT AT A GLANCE

Attribute	Details
Project Title	Meeting Minutes and Action-Item Tracker
Application Domain	Meeting and task management
Student Name & Register No.	Dakshesh N – 241401017
Zoho Creator Edition	Free / Trial
Application Name (Link Name)	Meeting Minutes and Action-Item Tracker
Published / Live URL	Not supplied
Demo Credentials (per role)	Not included in report
Number of Forms / Subforms	2 / 0
Number of Reports (by type)	List: 6; other types: not verified
Number of Pages / Dashboards	1 dashboard page created; live content to verify
Number of Workflows	Exact count not verified
Deluge Functions / Custom Actions	Not verified / not claimed
Integrations	None reported
Roles & Profiles Defined	Default access; custom roles not verified
Environments Used	Zoho Creator development workspace
Date of Production Deployment	Not verified

CHAPTER 1

INTRODUCTION

1.1 Background

The application supports teams that need to record meeting details and follow up on tasks. It centralises meeting minutes and action items in a single Zoho Creator application.

1.2 Problem Statement

Meeting records and assigned tasks can become scattered across notes and spreadsheets, making follow-up and status review difficult.

- Meeting information may be duplicated across files.
- Task ownership and due dates may be overlooked.
- Preparing a status summary requires manual checking.

1.3 Objectives

- Create forms for meeting records and action items.
- Link action items to the relevant meeting using a lookup field.
- Provide reports for meetings and task status.
- Create a dashboard page for a consolidated view.
- Test basic record creation and lookup behaviour.

1.4 Scope of the Project

Scope includes meeting and action-item records, a meeting lookup, reports and a dashboard page. External integrations, advanced access control and custom scripting are outside the verified scope.

1.5 Justification for a Low-Code Approach

Zoho Creator provides visual form, report and page builders suited to a small record-management application. These components reduce the amount of custom code required [1].

CHAPTER 2

LITERATURE SURVEY AND SYSTEM STUDY

2.1 Study of the Existing System

Meeting notes are written, action items are shared separately, and progress is checked manually through messages or spreadsheets.

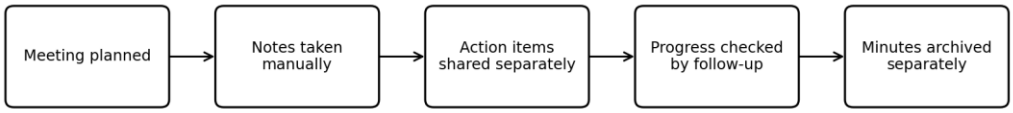

Figure 2.1: Existing Meeting and Follow-up Process

2.2 Limitations of the Existing System

2.3 Low-Code versus Traditional Development

Table 2.1: Comparison of Low-Code and Traditional Development for the Proposed Application

Criterion	Traditional Development	Low-Code on Zoho Creator
Development effort	Requires UI, data and server code	Visual forms, reports and pages
Skills	Programming and deployment skills	Platform and configuration skills
Hosting	Configured separately	Provided through the platform
Customisation	High flexibility	Bound by platform capabilities
Maintenance	Managed by development team	Some platform maintenance handled by provider
Cost	Depends on infrastructure and development	Lower setup effort for a small application
Mobile access	Requires responsive/app work	Platform-supported options
Security	Designed and configured by team	Uses platform controls; configuration still required

2.4 Literature Survey

Table 2.2: Summary of Literature Survey

S.No.	Author(s) / Source & Year	Title / Product	Key Findings	Relevance to this Project
1	Bucaioni et al., 2022	Modelling in low-code development	Reviews modelling practices in low-code development.	Supports visual data and process modelling [2].
2	Pinho et al., 2023	Usability in low-code platforms	Reviews usability considerations for low-code platforms.	Supports keeping forms and navigation simple [3].
3	Zoho Corporation	Creator Help Documentation	Documents Creator application components.	Reference for forms, reports and pages [1].
4	Zoho Corporation	Understand Applications	Explains the application structure.	Supports application setup [4].
5	Zoho Corporation	Understand Reports	Explains report capabilities.	Supports meeting and task reports [5].

2.5 Emerging Trends in Low-Code Development

Visual development, reusable components and workflow automation are common low-code capabilities. AI-assisted building and external integrations are possible future enhancements, not claimed as implemented here [2], [3].

2.6 Proposed System

The proposed system stores meetings and action items in separate forms, connects them through a lookup, and provides reports for reviewing records and task status.

CHAPTER 3

REQUIREMENT ANALYSIS

3.1 Stakeholders and User Roles

Table 3.1: Stakeholders and User Roles

Role	Description	Key Responsibilities in the Application
Application user	User entering records	Create meeting and action-item records
Reviewer	User reviewing records	View meeting and task reports
Administrator	Platform/application owner	Manage app configuration as permitted by account

3.2 Functional Requirements

Table 3.2: Functional Requirements

FR ID	Requirement	Role(s)	Priority
FR-01	The system shall store meeting details.	Application user	High
FR-02	The system shall store action-item details.	Application user	High
FR-03	The system shall link an action item to a meeting.	Application user	High
FR-04	The system shall display meeting records in a report.	Reviewer	Medium
FR-05	The system shall display action items by status.	Reviewer	Medium
FR-06	The system shall provide a dashboard page.	Reviewer	Medium
FR-07	The system shall support status, priority and due-date recording.	Application user	Medium

3.3 Non-Functional Requirements

Table 3.3: Non-Functional Requirements

NFR ID	Category	Requirement
NFR-01	Usability	Forms and reports should use clear labels.
NFR-02	Data integrity	Action items should reference the correct meeting.
NFR-03	Maintainability	Form and report names should remain consistent.
NFR-04	Availability	Availability depends on Zoho Creator service and account.
NFR-05	Security	Access should follow configured account permissions.
NFR-06	Performance	No performance benchmark was measured.

3.4 Hardware and Software Requirements

Table 3.4: Hardware and Software Requirements

Category	Specification
Platform	Zoho Creator Free / Trial
Scripting language	Deluge is available on the platform; custom scripts not verified
Browser	Modern web browser
API testing tool	Not used
Other Zoho services	None reported
Mobile	Not verified
Client hardware	Computer with internet access

3.5 Use Case Model

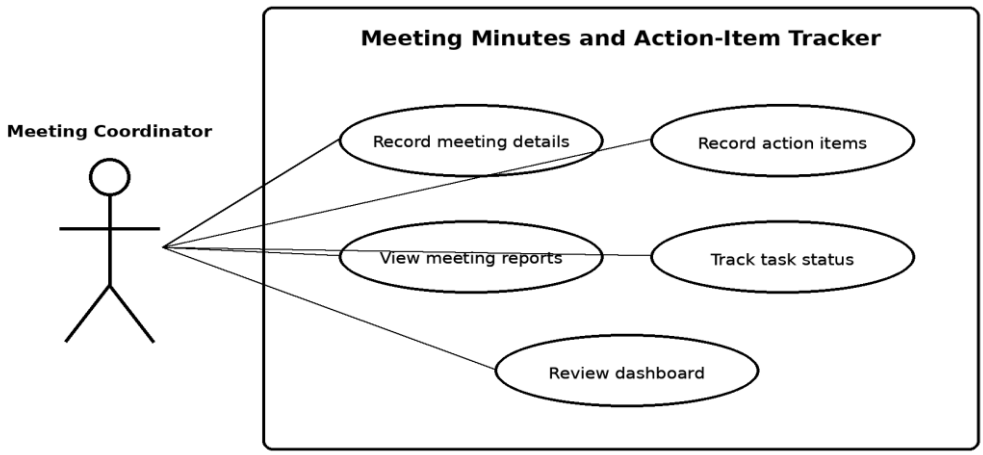

Figure 3.1: Use Case Diagram of the Application

Table 3.5: Use Case Description – Record a Meeting

Use Case ID	UC-01
Use Case Name	Record a meeting
Actor(s)	Application user
Pre-condition	User can access the application
Main Flow	1. Open Meetings. 2. Enter meeting details. 3. Submit the form.
Alternate Flow	Correct missing or inaccurate values before submission.
Post-condition	Meeting record is stored.
Related FR	FR-01

CHAPTER 4

SYSTEM DESIGN

4.1 System Architecture

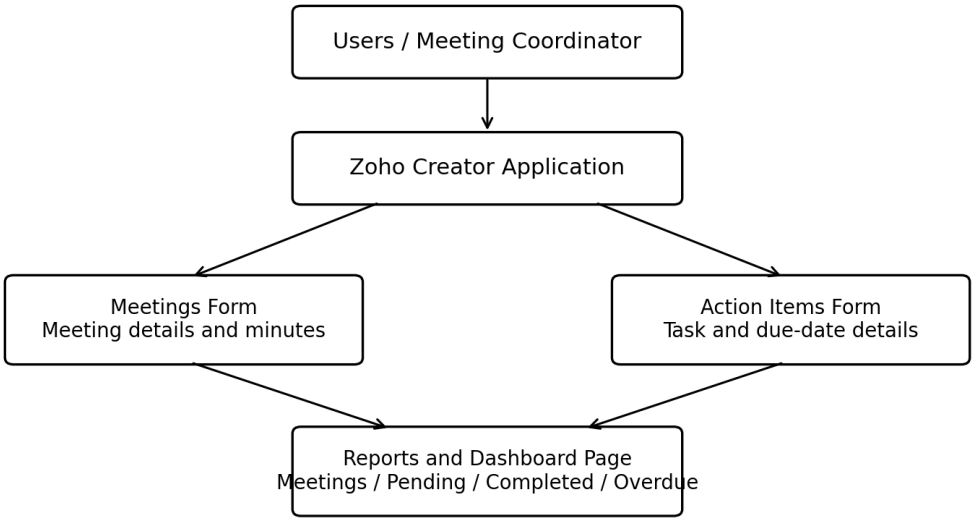

Figure 4.1: System Architecture of the Application

Users access the Zoho Creator application through its configured interface. Forms capture meeting and action-item data; reports display records. The Action Items form references Meetings through a lookup. No external integration is included.

4.2 Data Model

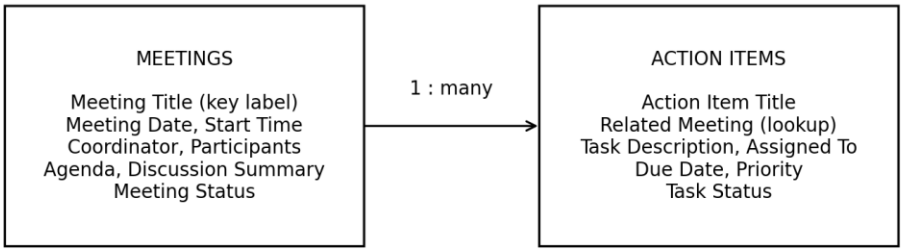

Figure 4.2: Entity–Relationship Diagram

Table 4.1: Entities and Relationships

Entity (Form)	Key Fields	Related To	Relationship Type	Implemented Using
Meetings	Title, date, time, coordinator, participants, agenda, summary, status	Action Items	One-to-many	Lookup in Action Items
Action Items	Title, description, assignee, due date, priority, status	Meetings	Many-to-one	Related Meeting lookup
Dashboard	Summary view	Reports	Displays records	Creator page builder

4.3 Form Design

Table 4.2: Field Specification – Meetings and Action Items

Field Label	Link Name	Field Type	Mandatory	Validation / Default	Remarks
Meeting Title	Not supplied	Not verified	Not verified	Enter title	Meetings form
Meeting Date	Not supplied	Date (expected; verify in app)	Not verified	Select date	Meetings form
Meeting Status	Not supplied	Drop Down (expected; verify)	Not verified	Scheduled / Completed / Cancelled	Meetings form
Action Item Title	Not supplied	Not verified	Not verified	Enter title	Action Items form
Related Meeting	Not supplied	Lookup	Not verified	Select meeting	Lookup tested
Due Date / Priority / Status	Not supplied	Not verified	Not verified	Enter/select values	Action Items form

4.4 Process and Workflow Design

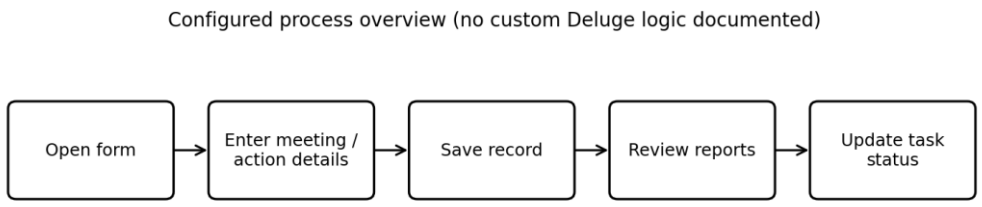

Figure 4.3: Meeting and Action-Item Process Flow

4.5 User Interface and Navigation Design

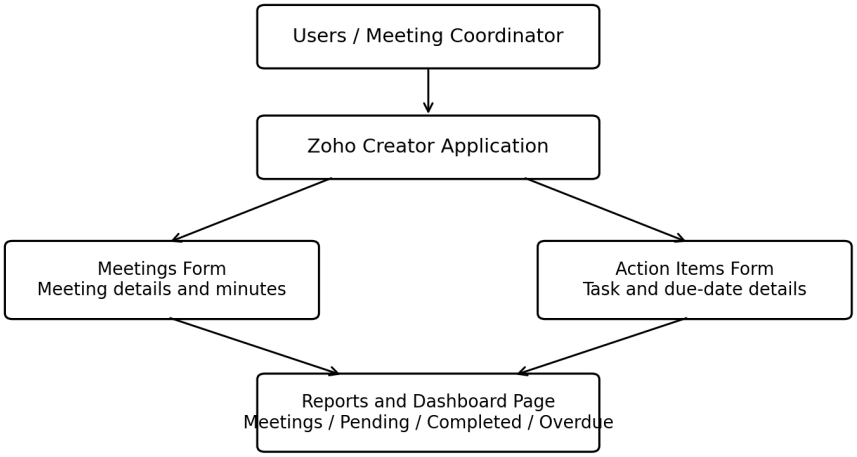

Figure 4.4: Application Navigation Structure

4.6 Access Control Design

Table 4.3: Role–Permission Matrix

Component	Default account access	Reviewer	Application user	Portal user
Meetings form	As configured	Not verified	As configured	Not used
Action Items form	As configured	Not verified	As configured	Not used
Meeting reports	As configured	Not verified	As configured	Not used
Task reports	As configured	Not verified	As configured	Not used
Dashboard page	As configured	Not verified	As configured	Not used

CHAPTER 5

IMPLEMENTATION

5.1 Application Setup

The application was created in Zoho Creator Free/Trial edition. It contains forms, reports and a dashboard page for meeting and action-item tracking.

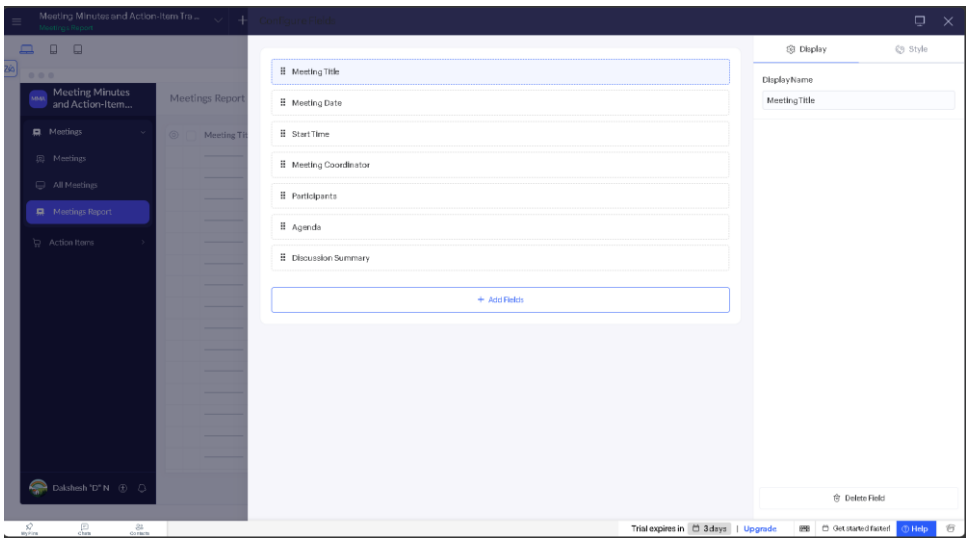

Figure 5.1: Application Setup

5.2 Forms and Data Capture

The Meetings form stores title, date, start time, coordinator, participants, agenda, discussion summary and status. The Action Items form stores task title, related meeting, description, assignee, due date, priority and status.

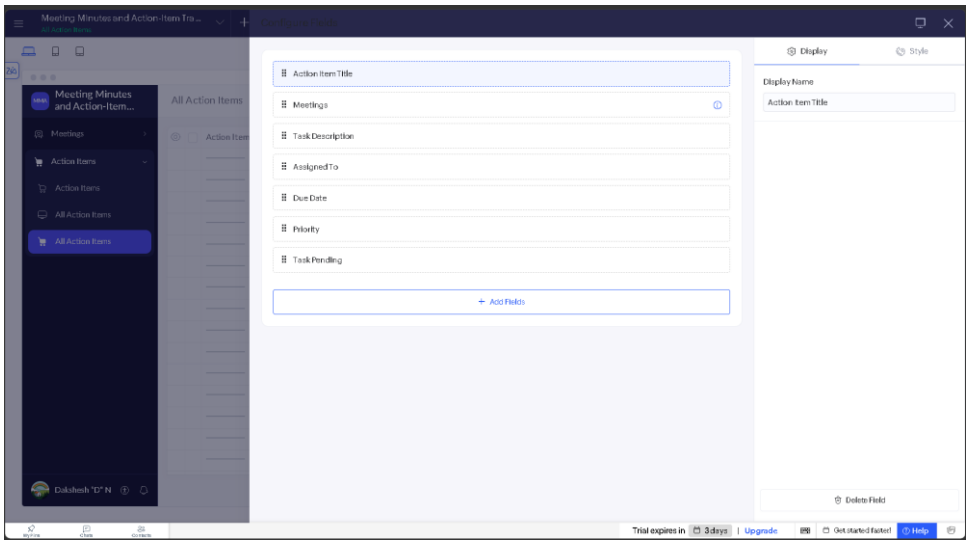

Figure 5.2: Meetings Form

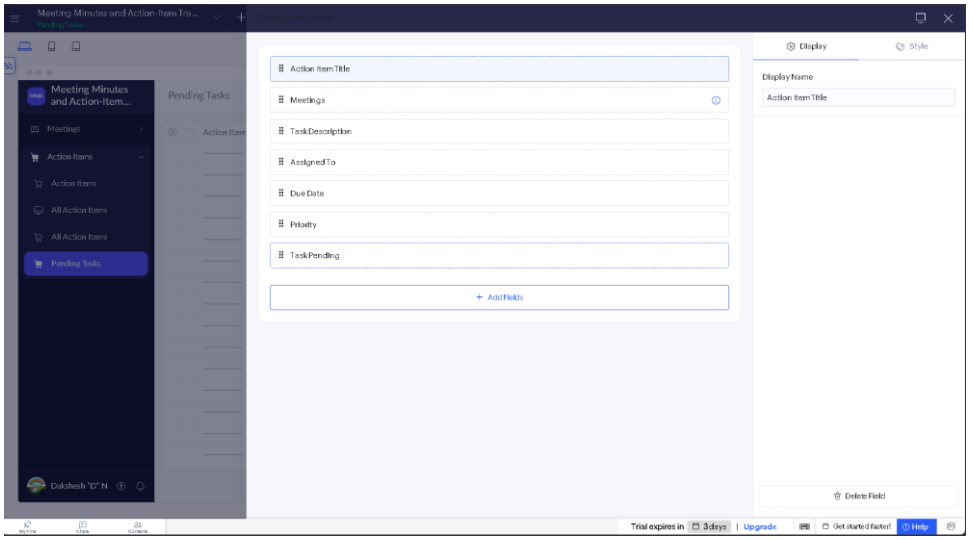

Figure 5.3: Action Items Form

5.3 Reports

Table 5.1: Reports Implemented

Report Name	Type	Source Form	Filter / Grouping / Sorting	Custom Actions	Roles
All Meetings	List	Meetings	All records	Not verified	Application user
Meetings Report	List	Meetings	Meeting records	Not verified	Reviewer
All Action Items	List	Action Items	All records	Not verified	Application user
Pending Tasks	List	Action Items	Pending status	Not verified	Reviewer
Completed Tasks / Overdue Tasks	List	Action Items	Status / due date	Not verified	Reviewer

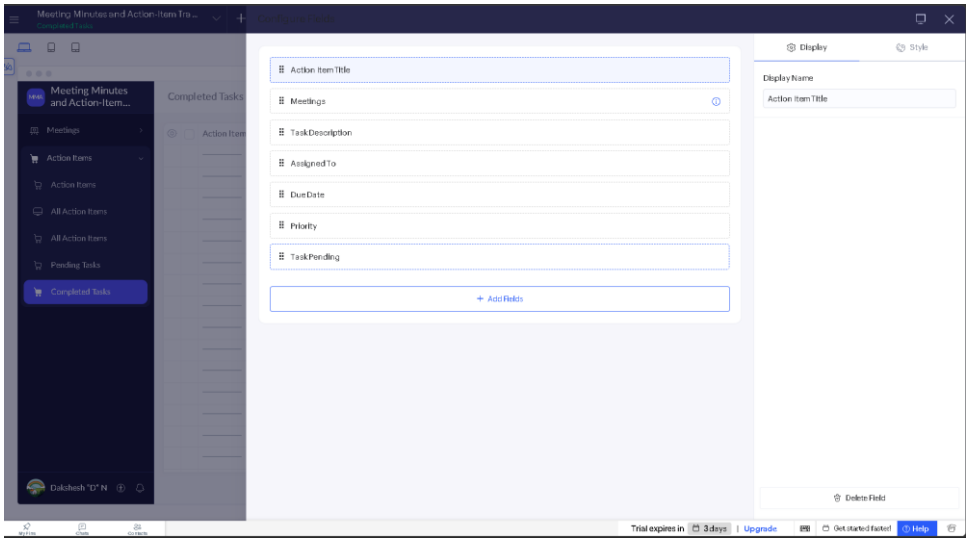

Figure 5.4: Meeting and Action-Item Reports

5.4 Pages and Dashboards

A dashboard page was created in the page builder. The final published content and its displayed metrics should be confirmed using a live-mode screenshot.

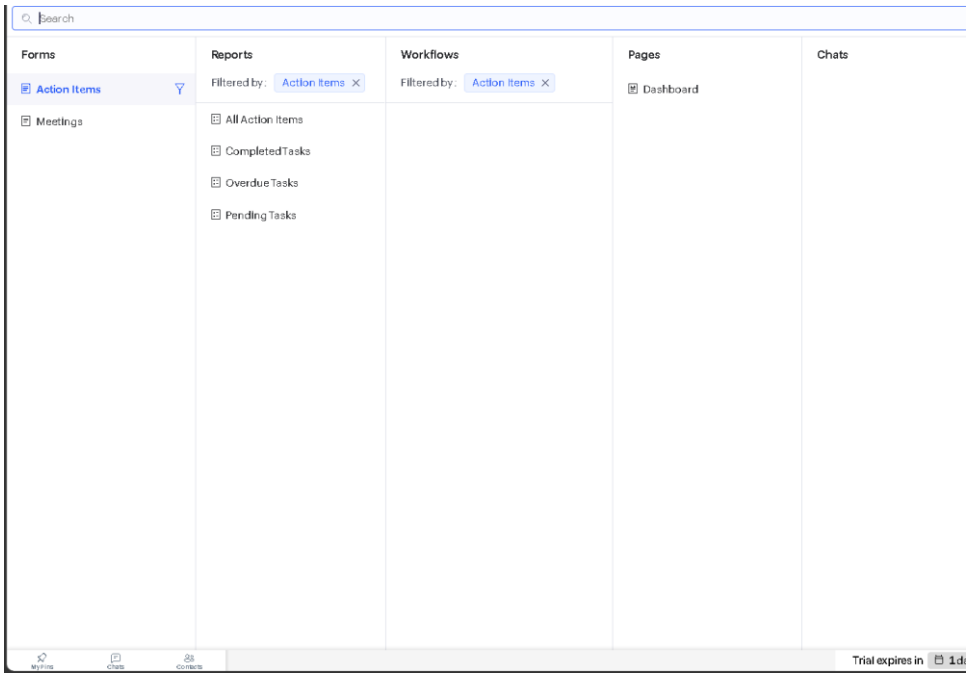

Figure 5.5: Dashboard Page

5.5 Deluge Scripting

Script ID	Location / Trigger	Purpose	Deluge Concepts Used
DS-01	Not supplied	No custom script verified	Not applicable
DS-02	Not supplied	No custom script verified	Not applicable
—	—	No additional scripts claimed	—
—	—	Custom source not supplied	—
—	—	See Appendix C	—

5.6 Workflows and Automation

5.7 Integrations

Integration	Service / Endpoint	Method	Authentication	Data Exchanged / Purpose
None reported	—	—	—	No external integration reported
—	—	—	—	—
—	—	—	—	—

5.8 User Management and Role-Based Access

The application uses the available default access configuration. Custom roles and permission profiles were not evidenced and are not claimed as implemented.

5.9 AI and Analytics Features

AI features are outside the current project scope.

5.10 Pro-Code Extension

No separate pro-code extension is included.

CHAPTER 6

TESTING AND DEBUGGING

6.1 Testing Strategy

Basic functional checking was performed by creating a sample meeting and a linked action item. The lookup relationship was checked. Other cases in Table 6.1 are proposed checks and must be marked after execution.

6.2 Test Cases

Table 6.1: Test Cases

TC ID	FR Ref.	Test Description	Input / Steps	Expected Result	Actual Result	Status
TC-01	FR-01	Create meeting	Enter sample meeting and submit	Meeting record saved	Sample record created	Passed
TC-02	FR-02	Create action item	Enter sample task and submit	Task record saved	Sample record created	Passed
TC-03	FR-03	Select related meeting	Choose a meeting in lookup	Correct meeting selected	Lookup tested	Passed
TC-04	FR-01	View meeting record	Open Meetings report	Saved record displayed	Not recorded	Pending verification
TC-05	FR-02	View action item	Open All Action Items	Saved task displayed	Not recorded	Pending verification
TC-06	FR-04	Open meeting report	Select Meetings Report	Meeting rows displayed	Not recorded	Pending verification
TC-07	FR-05	Open pending tasks	Select Pending Tasks	Pending rows displayed	Not recorded	Pending verification
TC-08	FR-05	Open completed tasks	Select Completed Tasks	Completed rows displayed	Not recorded	Pending verification
TC-09	FR-05	Review overdue tasks	Select Overdue Tasks	Overdue rows displayed	Not recorded	Pending verification
TC-10	FR-06	Open dashboard	Open dashboard page	Page opens	Live output not supplied	Pending verification
TC-11	FR-07	Set task priority	Select a priority and save	Selected priority is stored	Not recorded	Pending verification

TC ID	FR Ref.	Test Description	Input / Steps	Expected Result	Actual Result	Status
TC-12	FR-07	Set task status	Select a task status and save	Selected status is stored	Not recorded	Pending verification
TC-13	FR-07	Enter due date	Set a due date and save	Due date is stored	Not recorded	Pending verification
TC-14	FR-01	Submit incomplete meeting	Leave a required field blank and submit	Validation appears if field is mandatory	Mandatory settings not verified	Pending verification
TC-15	FR-03	Check lookup options	Open Related Meeting lookup	Existing meeting records are selectable	Lookup tested	Passed

6.3 Debugging Deluge Scripts

No custom Deluge script was available for script-level debugging.

6.4 Defect Log

Table 6.2: Defect Log

Bug ID	Description	Root Cause	Fix Applied	Status
—	No defect log supplied	—	—	Not recorded
—	No defect log supplied	—	—	Not recorded

6.5 User Acceptance Testing

Table 6.3: User Acceptance Feedback

User	Role Tested	Feedback	Action Taken
Not recorded	—	User acceptance feedback not supplied	Obtain feedback before final submission
Not recorded	—	User acceptance feedback not supplied	Obtain feedback before final submission

CHAPTER 7

DEPLOYMENT, SECURITY AND GOVERNANCE

7.1 Environments and Deployment Strategy

The application was built in the Zoho Creator environment. A live URL and production deployment evidence were not supplied, so deployment status should be confirmed before submission.

Table 7.1: Deployment Checklist

S.No.	Checklist Item	Done (✓)
1	Forms created	Yes
2	Meeting lookup tested	Yes
3	Reports created	Yes
4	Dashboard page created	Partial – verify live content
5	Custom Deluge scripts	Not verified
6	Integrations	No
7	Custom role permissions	Not verified

7.2 Performance Optimisation

Table 7.2: Performance Optimisation Results

Optimisation Applied	Component	Before	After	Improvement
Not measured	Reports	Not measured	Not measured	No performance claim
Not measured	Forms	Not measured	Not measured	No performance claim
Not measured	Dashboard	Not measured	Not measured	No performance claim

7.3 Security Features

Table 7.3: Security Controls Implemented

Security Control	Where Applied	Threat Mitigated
Account authentication	Zoho Creator account	Unauthorised sign-in; platform control
Application permissions	Default access configuration	Specific role restrictions not verified
Sensitive data controls	Not applicable to sample data	No custom control claimed
Audit trail	Not verified	Confirm in application settings

7.4 Governance and Administration

The application uses the available default access configuration. Advanced governance settings were not evaluated.

CHAPTER 8

RESULTS AND DISCUSSION

8.1 Application Output

A meeting is entered in the Meetings form. An action item is then entered and linked to that meeting. The records can be reviewed in the corresponding reports.

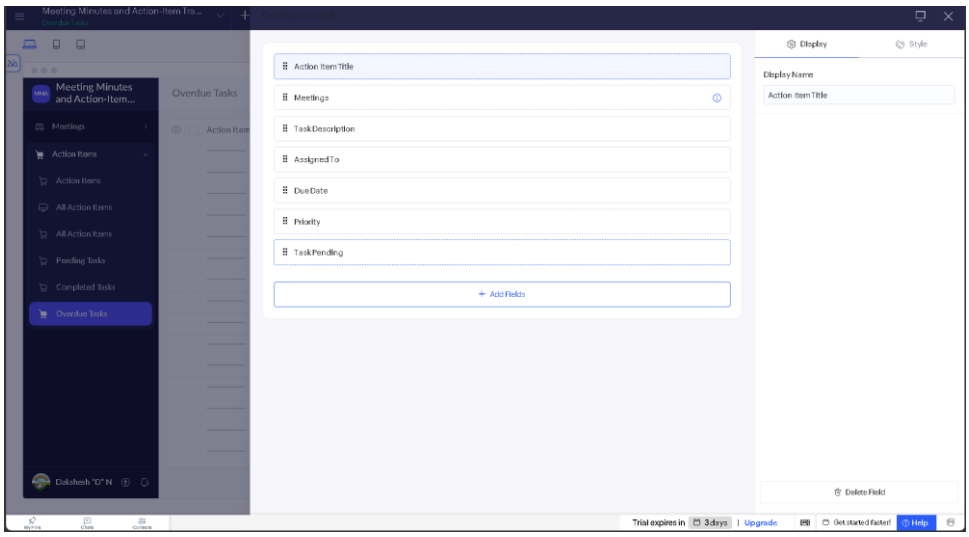

Figure 8.1: Step 1 – Enter Meeting

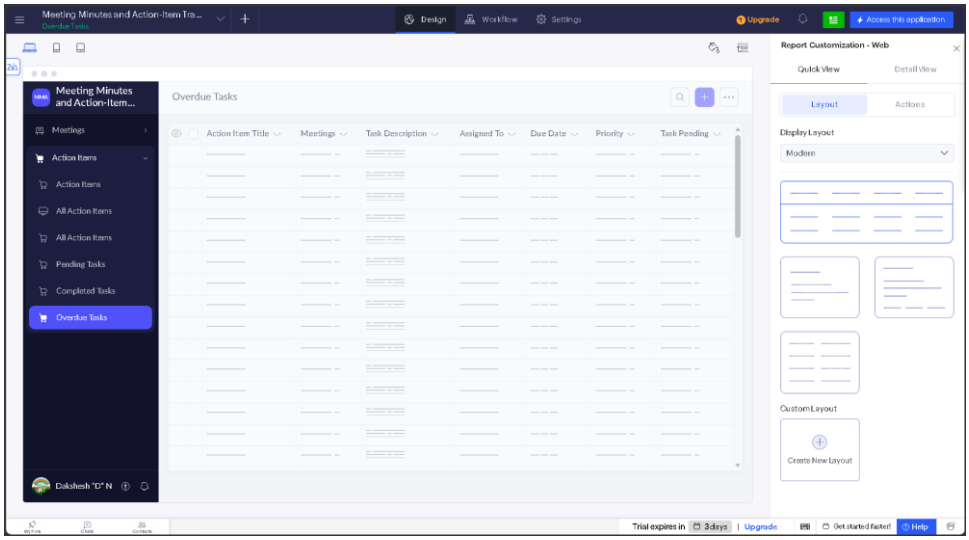

Figure 8.2: Step 2 – Link Action Item

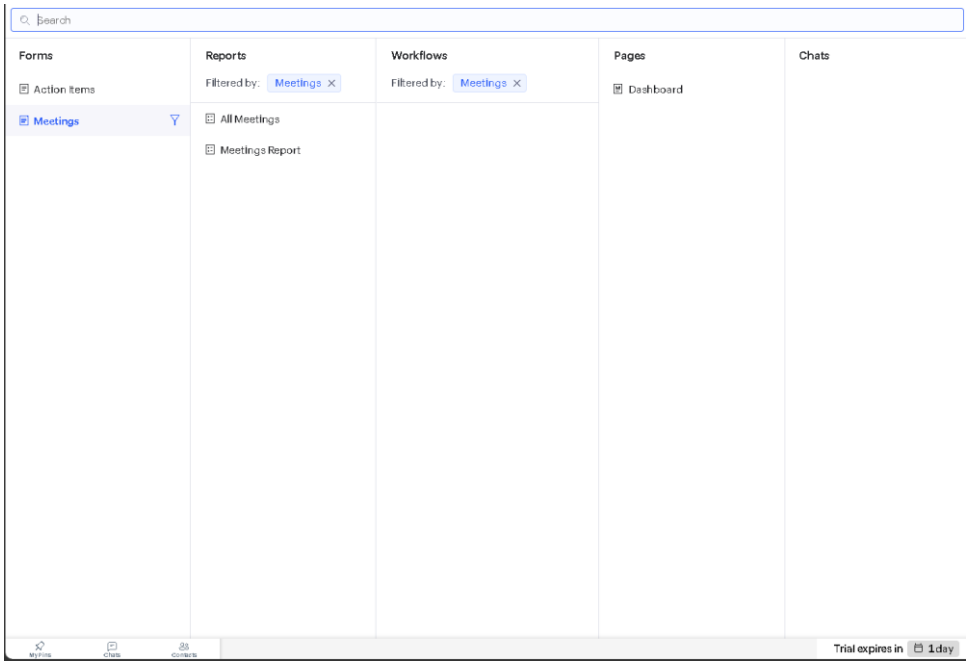

Figure 8.3: Step 3 – Review Reports

8.2 Achievement of Objectives

Table 8.1: Mapping of Objectives to Outcomes

Objective (Sec. 1.3)	Implemented Through	Outcome / Evidence
Record meetings	Meetings form	Sample record created
Link action items	Related Meeting lookup	Lookup tested
Review task status	Action-item reports	Reports created; filters to verify
Consolidated view	Dashboard page	Page created; live content to verify

8.3 Comparison with the Existing System

Table 8.2: Existing System versus Proposed Application

Parameter	Existing System	Proposed Application	Improvement
Storage	Separate notes / sheets	Creator forms	Centralised records
Task linking	Manual reference	Meeting lookup	Direct relationship
Status review	Manual checking	Status-based reports	Easier review
Summary view	Separate documents	Dashboard page	Potential consolidated view

8.4 Limitations of the Low-Code Approach

The project relies on the capabilities available in the selected Creator edition. Advanced integrations, custom scripts, access profiles and measured performance remain outside the verified scope.

8.5 Reflection on the No-Code → Low-Code → Pro-Code Spectrum

Forms, lookup configuration and reports use visual low-code configuration. No custom Deluge or pro-code components are claimed. A larger system with complex processing may require custom code or external services.

CHAPTER 9

CONCLUSION AND FUTURE ENHANCEMENTS

9.1 Conclusion

The Meeting Minutes and Action-Item Tracker provides a centralised structure for recording meetings and linking follow-up tasks. The implemented forms, lookup and reports demonstrate how Zoho Creator can support a small business process with limited custom code.

9.2 Future Enhancements

- Add reminders for tasks approaching their due dates.
- Add filters and summary charts to the dashboard.
- Configure user roles and test permissions; add integrations only if required.

9.3 Learning Outcomes and Career Relevance

The project provided practice in data modelling, form design, lookup relationships, reports and page building. These skills are relevant to low-code development and business-process automation.

APPENDIX A – ZOHO CREATOR FEATURE COVERAGE CHECKLIST

Table A.1: Feature Coverage Checklist

Unit	Zoho Creator Feature	Done	Where in the Application	Report Section	Figure / Code No.
Unit 1	Application setup	Yes	Creator app	5.1	Fig. 5.1
Unit 1	Forms	Yes	Meetings; Action Items	5.2	Figs. 5.2–5.3

Unit 5	App URL	Not supplied	Not provided	At a Glance	—

Total features implemented: confirm against the live application before submission.

APPENDIX B – COURSE OUTCOME MAPPING

Table B.1: Mapping of Course Outcomes to Report Chapters

CO	Course Outcome Statement	Evidenced In	Self-Assessed Level	Examiner Level
CO-1	Apply low-code development concepts	Chapters 1 and 5	2 – Medium	
CO-2	Design forms and data relationships	Chapter 4	2 – Medium	
CO-3	Create reports and pages	Chapter 5	2 – Medium	
CO-4	Test and evaluate an application	Chapter 6	1 – Low	
CO-5	Consider deployment and governance	Chapter 7	1 – Low	

APPENDIX C – COMPLETE DELUGE SOURCE CODE

C.1 Deluge source code

C.2 Additional Deluge source code

APPENDIX D – USER MANUAL

D.1 Accessing the Application

1. Sign in to Zoho Creator using the account with access to the application.
2. Open Meeting Minutes and Action-Item Tracker from the application list.

D.2 Instructions for Application User

- 1. Open Meetings and enter the meeting details, then submit the form.
- 2. Open Action Items, select the related meeting, enter task details and submit.

D.3 Reviewing Reports

- 1. Open Meetings and enter the meeting details, then submit the form.
- 2. Open Action Items, select the related meeting, enter task details and submit.

APPENDIX E – EVALUATION RUBRIC

(For Examiner Use Only)

Student Name	Dakshesh N	Register No.	241401017
Project Title	Meeting Minutes and Action-Item Tracker	Course	CB23F35

Table E.1: Evaluation Rubric for the Individual Project

S.No.	Criterion	Indicators	Max. Marks	Marks Awarded
1	Problem definition	Clarity and relevance	10	
2	Design	Data model and forms	15	
3	Implementation	Working application features	25	
4	Testing	Test coverage and evidence	15	
5	Report	Structure and documentation	15	
6	Demonstration	Application walkthrough	10	
7	Viva	Conceptual understanding	10	
Total			100	

Table E.2: Performance Level Descriptors

Level	% of Max. Marks	Descriptor
Excellent	85–100%	Complete, clear and well demonstrated
Good	70–84%	Mostly complete with minor gaps
Satisfactory	50–69%	Basic requirements demonstrated
Needs Improvement	Below 50%	Major gaps remain
