Roll Number	241401017
Platform	Zoho Creator
Course	Low-Code Application Development using Zoho Creator
Lab Record	Experiment 5

B.Tech Computer Science and Business Systems

Rajalakshmi Engineering College

1. Aim

To build a report, dashboard, and custom page using Zoho Creator Page Builder for the existing Bank Loan Application and Pre-Screening application.

2. Objectives

- Use the existing Loan Application report to present submitted application data.
- Create a custom dashboard page using Zoho Creator UI/Page Builder.
- Add a visual chart based on the Loan Type field.
- Display the application report within the dashboard.

3. Components Used

Component	Name / Configuration
Form	Loan_Application_Form
Report	Loan_Application_Form_Report
Custom Page	Loan_Application_Dashboard
Visualization	Loan Type Distribution – Pie Chart
Embedded View	Loan_Application_Form_Report

4. Procedure

1. Opened the existing Loan Application & Pre-Screening Management application in Zoho Creator.
2. Created the custom page Loan_Application_Dashboard.
3. Opened Page Builder and added dashboard elements.
4. Configured the dashboard using Loan_Application_Form as the data source.
5. Configured a Pie Chart to group applications by Loan_Type.
6. Included Loan_Application_Form_Report in the dashboard to display submitted applications.
7. Saved and opened the live dashboard to verify the displayed data.

5. Dashboard Design

The dashboard combines application metrics, a Loan Type Distribution visualization, and the existing loan application report in one custom page.

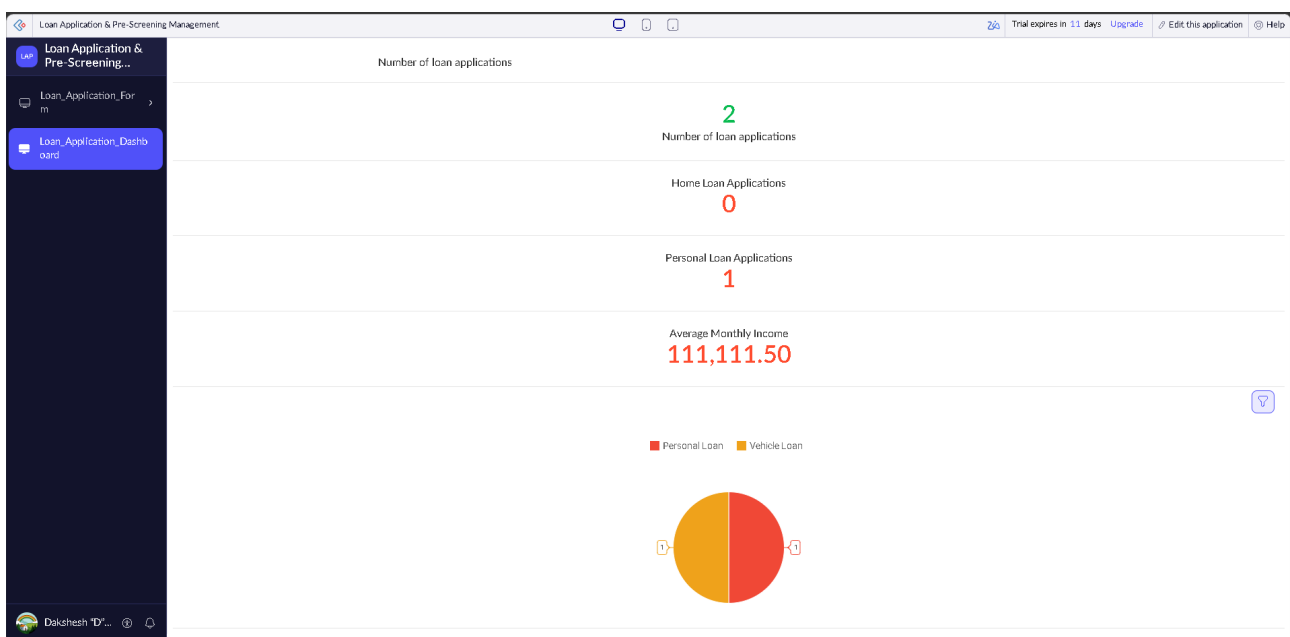

Figure 1 — Live Loan Application Dashboard showing application metrics and Loan Type Distribution.

6. Implementation Evidence (Continued)

The lower portion of the live dashboard contains the Loan_Application_Form_Report. The screenshot shows two submitted application records and confirms that the custom page is connected to live application data.

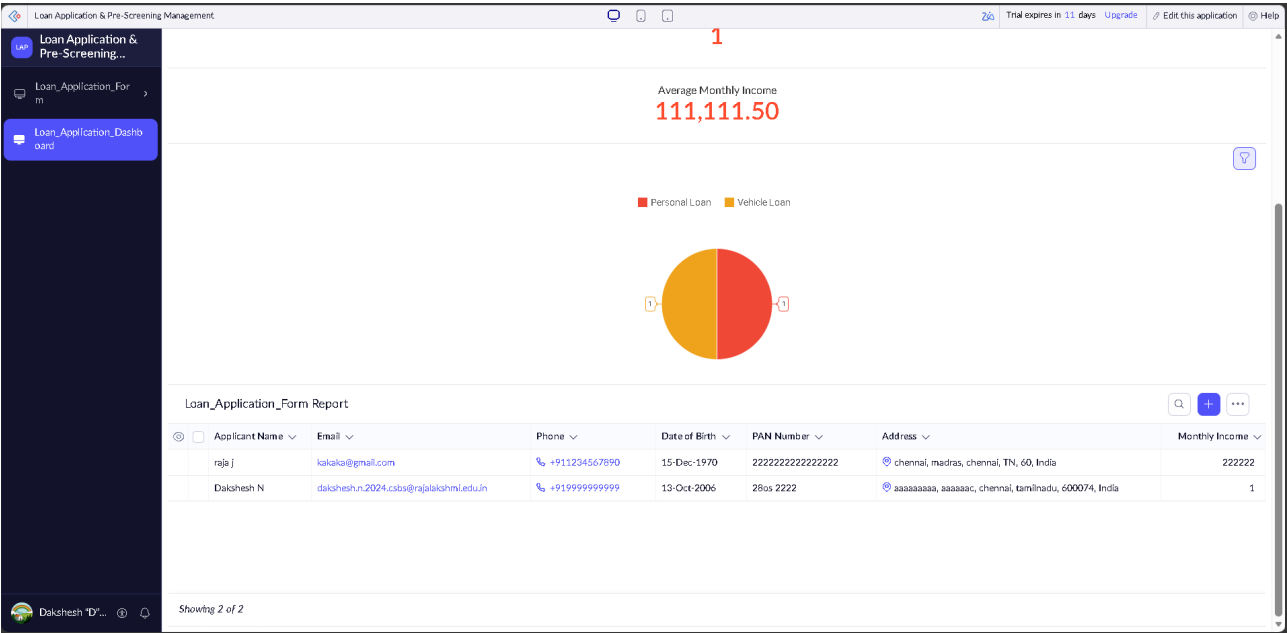

Figure 2 — Loan Application Dashboard with embedded Loan_Application_Form_Report.

7. Observed Dashboard Data

Metric / View	Observed result
Total applications	2
Home Loan Applications	0
Personal Loan Applications	1
Average Monthly Income	111,111.50
Loan Type Distribution	Personal Loan and Vehicle Loan
Embedded report	2 submitted records visible

8. Result

The Loan Application & Pre-Screening Management application was successfully extended with a custom dashboard page using Zoho Creator UI/Page Builder. The dashboard displays application metrics, a Loan Type Distribution chart, and the existing loan application report in a single view.

9. Learning Outcomes

- Created a custom Page in Zoho Creator.
- Used Page Builder elements for dashboard presentation.
- Configured a chart using form data and the Loan_Type field.
- Displayed an existing report within a custom dashboard.
- Understood how a dashboard presents current application data visually.

10. Conclusion

The experiment demonstrated the use of Zoho Creator reports, dashboards and custom pages for a business application. The completed Loan Application Dashboard provides a compact interface for viewing application statistics, loan-type distribution and submitted application records.
